ACN: 141 442 515

ON YOUR
WAY TO A
BETTER
TOMORROW

BETTER TOMORROWS PROGRAM

Funding free educational and/or therapist support for young people up to the age of 24, following treatment for brain or spinal cord tumours.

Eligible families are allocated a financial support package. Families may utilise their package to access the necessary support required by their child.

A PERSONALISED APPROACH TO YOUR NEEDS

The Better Tomorrows program seeks to provide personalised assistance by connecting young people affected by brain or spinal cord tumours to services such as:

1. Tuition support
2. Speech therapy
3. Occupational therapy
4. Physiotherapy
5. Psychological counselling

The program will strive to link recipients to ongoing support following hospital rehabilitation, GP and government assistance currently available to them.

HOW DO I APPLY?

Referrals may be made to the Brainchild Foundation's Better Tomorrows Program by parents, teachers and health care providers of eligible young people.

Referrals must confirm diagnosis of a brain or spinal cord tumour, treatment received and that the person being referred is aged between 0-24 years.

Parents and carers are also encouraged to enquire about the program. Referrals and enquires can be made either:

Via email to:
education@brainchild.org.au

Or in writing to:
The Brainchild Foundation
PO. Box 756, The Gap 4061

Parents and carers will then be required to complete an application form and provide any relevant reports from a neuropsychologist, physiotherapist, speech pathologist or occupational therapist.
